

**Vanquis Banking Group FY 2025 Results**  
**Analyst and Investor Conference Call Speech**  
**Ian McLaughlin, Chief Executive Officer**  
**Dave Watts, Chief Executive Officer**

**Ian McLaughlin, Chief Executive Officer**

Good morning everyone - thank you for joining us for Vanquis Banking Group's full year 2025 results.

I'm Ian McLaughlin, the Chief Executive Officer of Vanquis, and I'm joined this morning by our Chief Financial Officer, Dave Watts.

**Dave Watts, Chief Financial Officer**

Good morning.

## Agenda

Summary of FY25	Ian McLaughlin
FY25 Performance	Dave Watts
Strategy Update	Ian McLaughlin
Financial Guidance	Dave Watts
Conclusion	Ian McLaughlin
Q&A	Ian & Dave

2

### Ian McLaughlin, Chief Executive Officer

I'll start with an overview of our performance in 2025. Dave will then take you through the financial results in more detail.

I will then come back to talk about strategic priorities and Dave will end by covering our financial guidance through to full year 2027.

After that, as usual, we'll be happy to take your questions.

## Summary of FY25

Ian McLaughlin  
Chief Executive Officer

## FY25 Performance vs. Guidance

*FY25 performance materially improved on FY24; achieving all points of guidance with accelerated balance growth*

	FY24 Actuals	FY25 Guidance	FY25 Actuals	
Gross customer interest-earning balances <sup>1</sup>	£2,308m	>£2.7bn	£2,824m	✓
Net Interest Margin (NIM) <sup>2</sup>	18.5%	>16.5%	16.8%	✓
Cost: income ratio <sup>3</sup>	89.4%	High 50s	58.4%	✓
Statutory Return on Tangible Equity (ROTE) <sup>4</sup>	(32.1)%	Low single digits	2.3%	✓
Tier 1 ratio <sup>5</sup>	18.8%	>17.5%	19.3%	✓

Returned to profitability and on track to deliver improved ROTE in 2026 & 2027

4

If I can take you to slide 4, you can see how our full year performance compares against both the prior year and against the guidance that we set out at the start of 2025.

And the headline here is simple: we delivered a performance that was at, or better than, all of our key commitments for the year.

Most importantly, after the turnaround of the business in 2024, where we delivered a loss before tax of £138m, we returned to profitability in 2025, with a profit before tax of £8.3m.

During the year, we also took the opportunity to deploy capital to accelerate balance growth which will support our future profitability.

You can see that in our customer interest-earning balances which ended the year at £2.8bn, ahead of our guidance of greater than £2.7bn, and therefore well ahead of our original 2025 goal of greater than £2.6bn.

Net interest margin was 16.8%, reflecting a deliberate shift in mix towards lower risk secured lending in Second Charge Mortgages, as we have signalled previously. Excluding this, NIM actually increased by 50 bps, reflecting our continued pricing discipline in Cards and Vehicle Finance.

Our cost to income ratio was in the high 50s, so again in line with guidance and reflecting our improving operating efficiency.

Return on tangible equity was 2.3%, so consistent with our guidance for a low single-digit return.

Following the AT1 capital issuance in the second half of the year, our Tier 1 ratio increased to 19.3%, putting us in a strong position to support the next phase of our strategy.

So, while there’s always more to do, we have delivered what we said we would in 2025 - growing in a resilient and sustainable manner, with margins and costs under tight control.

After what is now five quarters of consecutive book growth, and four quarters of consecutive profitability, you can see that the actions that we have been taking over the past two years are translating into more predictable and sustainable financial outcomes.

## Accelerated balance growth and returned to profitability

*Deployed capital for sustainable growth, while maintaining disciplined pricing and cost control*

### Significant progress on the strategic transformation of the bank

1. **Sustainably grown interest-earning balances** and optimised mix to maximise return on deployed capital.
2. **Made strong progress on the Gateway technology transformation programme**, which is substantively delivered and is on track to complete in 2026.
3. **Delivered ongoing transformation cost savings** and generated positive operating leverage.
4. **Continued customer resilience**, with strong credit quality reflecting responsible lending.
5. **Further developed our award-winning proposition** to meet customer needs.

5

Slide 5 sets out the underlying actions we have taken to deliver the results I have just discussed. I will step through a few of these.

Firstly, as I have already mentioned we accelerated our balance growth, but did so with discipline, actively managing mix to maximise returns on deployed capital.

Secondly, we continued to make strong progress on Gateway, our technology transformation programme. The fundamentals of Gateway are now substantively delivered and the programme will complete this year.

We also delivered further transformation cost savings, with efficiency gains creating positive operating leverage as the business continued to scale.

Credit quality remains robust, reflecting continued customer resilience and responsible lending across all our portfolios.

And we continued to develop our customer proposition, a bit more on that in a moment.

Taken together, these actions will allow us to continue to transform the bank.

## FY25 Highlights

*Improving customer proposition with enhancements to risk management*

6

Slide 6 highlights the progress we made across our customer proposition and risk management during 2025.

We continued to strengthen all our product offerings - balancing growth, risk discipline and good customer outcomes.

And we got busy. In Credit Cards for example we launched 66 new product variants - including credit builder, balance transfer and other promotional offers.

We also expanded our retail savings range, including new ISAs and the Snoop-branded easy access account, strengthening deposit growth, product flexibility and cost-efficient funding.

And Snoop continues to play an increasingly important role in our ecosystem, helping customers with their money management. Active users were up 12% to 328,000, including 43,000 Vanquis customers.

We also grew our partnership with Fair Finance. In 2025, this helped 20,000 applicants identify around £34m in potential annual benefit entitlements - that’s an average of over £1,750 per annum per person – so genuinely helping people transform their financial lives for the better.

We delivered a profile-raising campaign to refresh and relaunch the Vanquis brand with target customers, including our successful partnership with the Professional Darts Corporation.

We also introduced a new, consistent customer satisfaction measure across the Group during the year, giving us a more data-driven view of customer experience.

Our overall CSI customer satisfaction score averaged 83.7 in 2025 and this is supported by consistently excellent Trustpilot ratings across both Vanquis and Moneybarn brands.

Fundamentally, of course, Vanquis is a risk management business. We have therefore prioritised making meaningful improvements to our risk management capabilities.

In Vehicle Finance we developed a new credit decisioning platform - improving the speed, consistency and quality of our lending decisions. And this contributed to the improved risk adjusted margin performance in the business.

In Credit Cards we made many improvements to our credit risk scorecards and affordability assessments, and we are upgrading the decisioning platform alongside other technology improvements, which I'll turn to more detail on that on slide 7.

## FY25 Highlights

*Technology transformation and operational efficiency on track*

Initiatives	What we have delivered	Key metrics
Technology transformation	<ul style="list-style-type: none"> <li>Launched our new mobile app, improving customer experience.</li> <li>Centralised c.30 billion rows of customer data on a new IT platform.</li> <li>Delivered operational efficiency improvements across key processes through expanded use of digital tools, AI, and self-service.                             <ul style="list-style-type: none"> <li>Reduced complaint handling costs by 10% and fraud losses by 25%.</li> </ul> </li> <li>Reduced our property footprint, including a 70%+ reduction in the office space of our Bradford headquarters.</li> <li>Improved colleague engagement, with a 73% trust score, meaning Vanquis is now certified as a Great Place to Work.</li> </ul>	<b>FY Technology and Operations cash investment spend</b> <b>£26.5m</b> 14% ↑ <small>(FY24: £23.2m)</small>
Operational efficiency		<b>Group headcount (Full Time Equivalent)<sup>5</sup></b> <b>1,252</b> 3% ↑ <small>(FY24: 1,215)</small>
People		<b>Outsourced headcount</b> <b>620</b> (28)% ↓ <small>(FY24: 860)</small>
		<b>FY transformation cost savings</b> <b>£28.8m</b> (41)% ↓ <small>(FY24: £48.9m)</small>
		<b>FY 'Great Place to Work' trust score (colleague engagement)</b> <b>73%</b> 13% ↑ <small>(FY24: 60%)</small>

7

We launched our new mobile app as part of an enhanced digital onboarding journey, underpinning our clear focus on improving customer engagement, conversion and retention.

And last February we centralised around 30 billion rows of customer, product and decisioning data onto a single modern platform, significantly strengthening analytics, insight and decision-making capabilities.

In operations we expanded the use of digital tools, AI and self-service functionality across key processes, again significantly improving efficiency.

The impact here is tangible. Complaints handling costs, for example, were down 10% and fraud losses fell by 25% in 2025 as a result of these improved processes.

We are applying this disciplined approach across every aspect of our business, a good example is that we have reviewed our property footprint and reduced space at our Bradford headquarters by over 70%, as we modernise and right-size to align with current and future workspace needs.

Finally, all we have delivered is down to the engagement and efforts of our fantastic people and we were pleased to see that colleague engagement improved significantly through the year, up 13 points to 73%.

That improvement reflects growing confidence in the direction and performance of our business and resulted in Vanquis being certified as a Great Place to Work for the first time ever.

As I said earlier there is more to do and we are not finished yet. But hopefully you can see that the progress made in 2025 is tangible, and we are seeing a positive response from colleagues and from customers.

Alongside this internal progress, I should note that the external headwinds of 2024 and 2025 have also largely receded. For example, elevated FOS fees from unmerited CMC complaints. Dave will touch on that shortly and remind you that our exposure to motor finance commissions is differentiated and any potential liability remains limited for Vanquis.

Overall, the two words I have used most to describe 2025 are discipline and delivery - both these will serve us well as we take the business forward from here.

With that, I'll now hand over to Dave to take you through the financials in more detail. Dave, over to you.

## FY25 Financial Performance

Dave Watts  
Chief Financial Officer

**Dave Watts, Chief Financial Officer**

Thank you, Ian.

### Focused on creating long-term shareholder value

*Driving sustainable, profitable growth*

1. **Returned to profitability in 2025** driven by improved operational efficiency.
2. **Optimised our capital stack**, with additional capital deployed to accelerate balance growth.
3. **Credit quality remained strong**, reflecting continued customer resilience and responsible lending.
4. **Maintained cost discipline**, delivering ongoing cost savings while investing in the business, including in technology transformation via Gateway.
5. **Complaint costs were meaningfully lower**, particularly following the new FOS fee charging structure.
6. **Dynamically managed liquidity and funding** to minimise cost of funds.
7. **Have limited liability on motor finance commissions**, having recognised a £3.0m provision for the proposed FCA compensation scheme.

Driving continued operational efficiency and deploying capital in the most accretive opportunities to generate higher returns.

9

I am pleased to present our results today given the significant progress we have made in 2025. Slide 9 summarises my headlines, before I go into more detail.

Our return to profitability was achieved by growing income, reducing costs, and importantly, the non-repeat of the notable items that we reported in 2024. This is evidence that the financial

impact of the business turnaround is firmly behind us, and we were able to focus on sustainable, profitable growth in 2025.

With this backdrop, we accelerated balance growth to build scale and drive long-term profitability.

This was aided by our first AT1 issuance in October last year which freed up additional capital to be deployed for growth.

This growth comes with upfront IFRS9 impairment charges, although credit quality remained strong, and write-offs decreased.

We maintained our cost discipline, delivering ongoing cost savings in excess of our commitment for the year. At the same time, we continued to invest in improving the fundamentals of the business, including our technology capabilities, via the Gateway transformation programme.

Following the new FOS fee charging structure, implemented in April last year, we saw a material reduction in CMC claims to FOS, resulting in much lower complaint costs in 2025.

We also continued to dynamically manage liquidity and funding. We diversified our Liquid Asset Buffer investments to generate higher returns. We introduced new savings products to provide more stability and flexibility, while lowering our cost of funds.

As a reminder, our exposure to motor finance commissions is differentiated and any potential liability is limited. While the final scope and mechanics of the FCA compensation scheme remain subject to change, we did recognise a £3m provision in 3Q25. You can find further details on why our exposure is differentiated in the Appendix.

## FY25 Group performance

*Returned to profitability alongside accelerated balance growth within risk appetite*

Income Statement	FY25	FY24 <sup>7</sup>	Change
	£m	£m	%
Net interest income	418.4	407.9	3%
Non-interest income	36.5	38.5	(5)%
<b>Total income</b>	<b>454.9</b>	<b>446.4</b>	<b>2%</b>
Impairment charges	(181.1)	(185.3)	(2)%
<b>Risk-adjusted income</b>	<b>273.8</b>	<b>261.1</b>	<b>5%</b>
Operating costs	(265.5)	(399.1)	(33)%
<b>Profit/(loss) before tax from continuing operations</b>	<b>8.3</b>	<b>(138.0)</b>	
Tax (charge)/credit	(0.3)	17.4	
<b>Profit/(loss) after tax from continuing operations</b>	<b>8.0</b>	<b>(120.6)</b>	
Profit after tax from discontinued operations	0.7	1.3	(46)%
<b>Statutory profit/(loss) after tax</b>	<b>8.7</b>	<b>(119.3)</b>	
AT1 distributions (gross of tax)	(0.5)	-	100%
<b>Statutory profit/(loss) attributable to shareholders</b>	<b>8.2</b>	<b>(119.3)</b>	
<b>Notable items</b>			
Provision for motor finance compensation	(3.0)	-	
Goodwill write-off	-	(71.2)	
Transformation & other exceptional costs	-	(24.1)	
Amortisation of acquisition intangibles	-	(6.2)	
Vehicle Finance receivables review - <i>Income</i>	-	(4.5)	
Vehicle Finance receivables review - <i>Impairment</i>	-	(15.1)	
Other one-off cost items	-	(10.2)	
<b>Total notable items</b>	<b>(3.0)</b>	<b>(131.3)</b>	
<b>Receivables</b>			
	DEC25	DEC24 <sup>7</sup>	Change
	£m	£m	%
<b>Gross customer interest-earning balances<sup>1</sup></b>	<b>2,824</b>	<b>2,308</b>	<b>22%</b>
Average gross customer interest-earning balances (excluding Personal Loans) <sup>8</sup>	2,495	2,207	13%
Net receivables <sup>9</sup>	2,691	2,155	25%

- **Net interest income** increased 3%, reflecting a 13% increase in average balances offset by lower NIM from Second Charge Mortgages (2CM) growth.
- **Impairment charges** decreased 2%, reflecting an underlying improvement in credit quality and the non-repeat of the impact of the Vehicle Finance (VF) receivables review.
- **Risk-adjusted income** improved 5% YoY (DEC25 vs DEC24).
- **Operating costs** reduced 33% reflecting the non-repeat of £111.7m of 2024 notable items, with costs excl. notable items down 9%.
  - Further transformation cost savings and reduced complaint costs were partially offset by growth, inflation and accruals for discretionary staff costs.
  - Excluding notable items, cost: income jaws were 11% YoY.
- **Profit before tax from continuing operations** of £8.3m.
- **Profit after tax from discontinued operations** related to the Personal Loans portfolio. The sale completed at the end of 1Q25.
- **£3.0m provision for motor finance compensation** was the only notable items in 2025.
- **Gross customer interest-earning balances** increased 22% YoY, reflecting increased balances in Credit Cards and 2CM.
- **Net receivables** increased 25%, reflecting lower-risk 2CM growth.

10

Going into more detail, slide 10 summarises the Group's performance for 2025.

We generated a profit from continuing operations of £8.3m pounds supported by a 5% growth in risk adjusted income and a 33% reduction in operating costs.

Excluding notable items costs were down 9% meaning the Group generated 11% positive cost: income jaws.

After factoring in tax, the profit from discontinued operations relating to the sale of the Personal Loans business and AT1 coupon costs, profit attributable to shareholders was £8.2m pounds.

At the same time we grew customer interest earning balances by 22% to over £2.8bn.

## FY25 Group key performance metrics

*Improving cost: income ratio driving low single digits ROTE*

	FY25 %	FY24 <sup>7</sup> %	Change
<b>Selected key metrics</b>			
Asset yield <sup>10</sup>	21.0	22.8	(1.8)
<b>Net interest margin (NIM)<sup>2</sup></b>	<b>16.8</b>	18.5	(1.7)
Total income margin (TIM) <sup>11</sup>	18.2	20.2	(2.0)
Cost of risk <sup>12</sup>	(7.3)	(8.4)	(1.1)
Risk-adjusted margin (RAM) <sup>13</sup>	11.0	11.8	(0.8)
<b>Cost: income ratio<sup>3</sup></b>	<b>58.4</b>	89.4	(31.0)
Average tangible equity (£m)	360	372	(3)%
<b>Statutory ROTE<sup>4</sup></b>	<b>2.3</b>	(32.1)	<b>34.4</b>
Basic earnings per share (EPS) (p) <sup>14</sup>	3.2	(46.7)	-
Dividend per share (p)	-	-	-
	DEC25 £m	DEC24 £m	Change
<b>Capital, liquidity, funding and balance sheet metrics</b>			
<b>CET1 ratio<sup>15</sup></b>	<b>16.5%</b>	18.8%	(2.3)
Risk weighted assets (RWA) <sup>16</sup>	2,073	1,835	13%
High quality liquid assets (HQLA) <sup>17</sup>	998	947	5%
Liquidity coverage ratio (LCR) <sup>18</sup>	306%	359%	(53)
Retail deposits	2,984	2,399	24%
Retail funding (% of all funding) <sup>19</sup>	89.7%	85.6%	4.1
Tangible net asset value (TNAV)	358	358	-
TNAV per share (p) <sup>20</sup>	143	140	2%

- **Asset yield** decreased 1.8% YoY, reflecting lower yield on 2CM. Credit Cards yield reduced marginally, reflecting growth in 0% balance transfers (BTs) and promotional products, while VF yield improved.
- **NIM** reduced 1.7%, driven by the lower margin in 2CM, partially offset by lower cost of funds.
- **RAM** reduced 0.8%, driven by a 2.0% reduction in **TIM**, partially offset by 1.1% lower **cost of risk**.
- **Cost: income ratio** improvement reflected income growth, cost reductions and the non-repeat of notable items.
- **ROTE** of 2.3%, in line with FY25 guidance of low single digits.
- **CET1 capital ratio** reduced 2.3%, with earnings and the 40bps benefit from the Personal Loans portfolio sale more than offset by growth driving a 13% increase in RWAs.
- **Liquidity and funding** remained strong, while being managed more dynamically.
- **Retail deposits** growth was driven by a broader product range, including ISAs and the Snoop Easy Access branded product.

11

On Slide 11, you can see what this meant for our financial KPIs.

£8.2m of bottom-line profits translated into a return on tangible equity of 2.3%, in line with our guidance.

This was driven by an improvement in the cost: income ratio to 58.4%, again in line with guidance.

As we previously guided to, asset yield, NIM and total income margin all reduced, driven by the deliberate growth in lower margin, lower risk, Second Charge Mortgages.

The reduction in risk adjusted margin to 11% was smaller, only 80 basis points, reflecting a 110-basis points reduction in the cost of risk.

With greater clarity on the cost of risk across our products, we intend to focus on risk-adjusted margin, as a core metric going forward.

## Net Interest Margin

Reduction reflects deliberate change in mix of balances by product

- **Interest income** increased YoY, driven by growth in 2CM and Credit Cards, along with pricing improvements in Credit Cards and VF. This was partially offset by lower VF balances.
- **Interest expense** increased YoY, reflecting increased funding requirements for balance growth, partially offset by the lower BoE base rate, reduced rate outlook and maturing fixed-term deposits being refinanced with lower interest rate savings products.
- **NIM** reduced 1.7% in line with expectations, due to growth in lower-margin, lower-risk 2CM.
  - Excluding 2CM, FY25 NIM increased 0.5% to 19.4%

The NIM drivers are set out on Slide 12.

A small 20 basis points reduction in asset yield was more than offset by a 50-basis points improvement from lower funding costs.

This net positive outcome was more than offset by a 170-basis points dilution due to a shift in mix toward Second Charge Mortgages, and a 30 basis points reduction from a larger Liquid Asset Buffer.

As a result, NIM decreased to 16.8%. However, to highlight the Group's pricing discipline, excluding Second Charge Mortgages, NIM increased 50 basis points year-on-year to 19.4%.

After factoring in balance growth net interest income rose by 3% in 2025 and, importantly, it rose by 6% in the second half of the year.

## Gross customer interest-earning balances

*Strong growth in Credit Cards and 2CM. Proactively managing new business growth in VF*

Gross customer interest-earning balances movement (£m)<sup>1</sup>

Gross customer interest-earning balances trend (£m)<sup>1</sup>

- **Gross customer interest-earning balances** increased 22% since DEC24, of which 6% in 4Q25.
- **Credit Card balances** increased 19%, reflecting both new customer acquisitions and increased card utilisation of existing customers following credit line extensions and risk-based repricing.
- **VF balances** decreased 8%, as new business growth was proactively managed while the new onboarding and servicing platform is developed.
- **2CM balances** continued to grow strongly via forward flow agreements with Interbridge Mortgages and Selina Finance.
- **Personal Loans portfolio sale** completed at the end of 1Q25.
- Overall, **increasing proportion of secured vs unsecured balances.**

Slide 13 details our customer interest earning balances, which increased to over £2.8bn.

Credit Card balances increased 19%. This reflected both new customer acquisitions and increased card utilisation by existing customers.

Vehicle Finance balances reduced by 8% as we managed new business growth while we develop the new onboarding and servicing platform.

Second Charge Mortgages continued to grow strongly, increasing by over £380m.

Gross and net receivables increased by 21%, and 25%, respectively.

Importantly, we now have established debt sale programmes in both Credit Cards and Vehicle Finance, with the Vehicle Finance post charge off asset, continuing to reduce, following the completion of a number of debt sales. Further details are set out in the Appendix.

## Impairment charges

Reduced gross and net charge-offs reflects customer resilience and strong risk management

Impairment charges (£m)	FY25 £m	FY24 <sup>7</sup> £m	Change %
Gross charge-offs	(253.2)	(266.4)	(5)%
Recoveries	50.0	53.0	(6)%
<b>Net charge-offs</b>	<b>(203.2)</b>	<b>(213.4)</b>	<b>(5)%</b>
Net risk movements	(171.4)	(200.0)	(14)%
Releases due to write-offs & debt sales	183.5	224.2	(18)%
Other incl. impact of VF review in FY24 <sup>24</sup>	10.0	3.9	151%
<b>IFRS9 modelled impairment/other</b>	<b>22.1</b>	<b>28.1</b>	<b>(21)%</b>
<b>Impairment charges</b>	<b>(181.1)</b>	<b>(185.3)</b>	<b>(2)%</b>
<b>Group cost of risk<sup>12</sup></b>	<b>(7.3)%</b>	<b>(8.4)%</b>	<b>1.1</b>
Credit Cards	(10.2)%	(9.4)%	(0.8)
Vehicle Finance	(5.6)%	(7.3)%	1.7
Second Charge Mortgages	(0.2)%	(0.3)%	0.1

	FY25 £m	FY24 £m	Change %
<b>Credit Cards</b>			
Gross charge-offs	(174.2)	(215.8)	(19)%
Recoveries	41.9	51.4	(18)%
<b>Net charge-offs</b>	<b>(132.3)</b>	<b>(164.4)</b>	<b>(20)%</b>
IFRS9 modelled impairment/other	(7.3)	40.5	
<b>Impairment charges</b>	<b>(139.6)</b>	<b>(123.9)</b>	<b>13%</b>
<b>Vehicle Finance</b>			
Gross charge-offs	(79.0)	(374.9)	
Recoveries	8.1	24.7	
<b>Net charge-offs</b>	<b>(70.9)</b>	<b>(350.2)</b>	
IFRS9 modelled impairment/other	29.4	289.8	
<b>Impairment charges</b>	<b>(41.5)</b>	<b>(60.4)</b>	<b>(31)%</b>

- **Gross charge-offs** reduced 5% YoY, reflecting ongoing customer resilience.
  - **Credit Card gross charge-offs** reduced 19%, reflecting a gross charge-off rate of 12.7% (FY24: 16.4%).
- **IFRS9 modelled impairment** benefit reduced YoY.
  - **Net risk movements** reflect stage migrations and changes in post model adjustments (PMAs).
- **2025 cost of risk** across products in line with guided expectations.
  - **Credit Cards:** 10.2% against guidance of 10-14% (new guidance: 10-13%).
  - **VF:** 5.6% against guidance of 4-6% (new guidance: 5-7%).
  - **2CM:** 0.2% against guidance of <1% (guidance unchanged).

14

Slide 14 summarises the year-on-year impairment charge movement.

Bottom line, impairment reduced by 2%, driven by a 5% reduction in gross charge-offs.

Within this, Credit Card gross charge offs reduced by 19%, to a gross charge off rate of 12.7%.

This highlights the improving quality of the portfolio.

Back-book credit risk improved with fewer negative stage migrations and lower impairment releases from write-offs and debt sales.

In summary, the overall Group cost of risk has reduced to 7.3%, with all products coming within guided expectations, reflecting our responsible approach to lending.

As you would expect, we anticipate impairment will increase in 2026 in line with balance growth and have slightly refined the cost of risk guidance, by product, on this slide.

In the Appendix we have included a slide on Expected Credit Losses and coverage ratios.

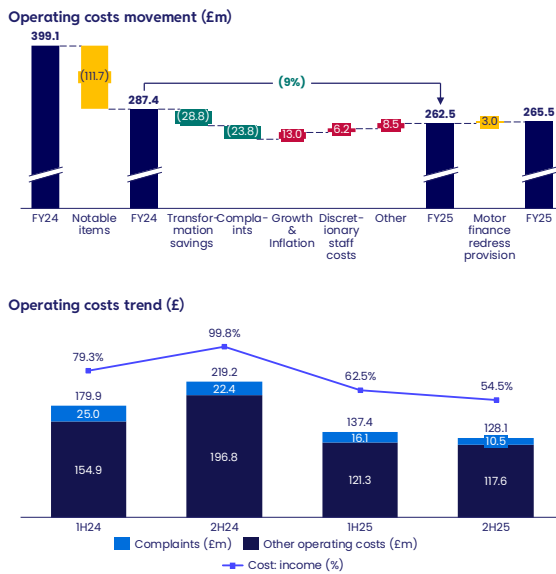

ECLs reduced by 7% despite a 21% increase in gross receivables, reflecting increased stage 1 and stage 2 balances and a reduction in stage 3.

As a result of this improving credit quality the Group coverage ratio reduced to 8.4%.

We remain comfortable with the current coverage ratio based on a clearer understanding of the credit risk of our portfolios.

## Operating costs

Cost discipline maintained, with transformation savings ahead of plan

Costs by type (£m) & Full-time equivalent headcount (FTE) (#)

	FY25 £m	FY24 <sup>7</sup> £m	Change %
<b>Cost by type (£m)</b>			
Staff and outsourced people costs <sup>25</sup>	(130.6)	(128.6)	2%
Administrative <sup>26</sup>	(122.3)	(140.4)	(13)%
Depreciation, amortisation and write-offs	(9.6)	(18.4)	(48)%
Notable items	(3.0)	(111.7)	(97)%
<b>Total operating costs</b>	<b>(265.5)</b>	<b>(399.1)</b>	<b>(33)%</b>
<i>Of which complaint costs (see slide 43)</i>	<i>(26.6)</i>	<i>(47.4)</i>	<i>(44)%</i>
<b>FTEs by area (#)<sup>6</sup></b>			
Customer facing & support	610	552	10%
Technology & change	382	400	(5)%
Functions & other	260	263	(1)%
<b>Total FTE</b>	<b>1,252</b>	<b>1,215</b>	<b>3%</b>

- **Delivered £28.8m of Transformation savings**, greater than the £15m committed in 2025.
- **Taken actions to realise saves from Gateway technology transformation in 2025** (previously expected in later years).
- **Lower outsourced people costs** with FTE reduced from 860 at DEC24 to 620 at DEC25.
- **Discretionary staff costs includes a bonus accrual in 2025** after no bonuses paid to staff in 2023 or 2024.

15

Turning to operating costs on Slide 15.

Total operating costs fell 33% primarily due to the absence of 2024’s notable items.

Costs, excluding notable items, reduced 9%, with transformation savings and lower complaint costs more than offsetting growth and inflation-related increases.

We delivered £28.8m of transformation cost savings in 2025, well above the £15m we committed to. This included an acceleration of some Gateway technology driven savings into 2025.

Complaint costs reduced 44% to £26.6m. This amount includes the £3m provision for motor finance redress.

Excluding this provision, total complaint costs reduced to £7.5m in the second half, a much lower run rate than previously.

As set out in the Appendix the material drop in FOS referrals from CMCs, following the introduction of the new FOS charging structure in April, was the main driver of the reduction.

We did accrue discretionary staff costs, having not paid bonuses to colleagues for the last two years.

This, alongside a 10% increase in customer-focused FTE, drove a 2% increase in staff and outsourced people costs, albeit our outsourced FTE reduced by 28% in the year.

We have embedded cost discipline across the business. We expect operating costs to reduce further in 2026, and in 2027, driven by both Gateway and broader operating efficiency enhancements.

## Credit Cards

Balances returned to above 2023 levels, having improved the quality of the portfolio

	FY25 £m	FY24 <sup>7</sup> £m	Change %
Interest income	370.8	365.7	1%
Interest expense	(51.6)	(53.2)	(3)%

Customers ('000)	1,339	1,267	6%
Average balance (£)	1,115	990	13%
Average customer limit (£)	2,514	2,156	17%

Gross customer interest-earning balances (£m) & risk-adjusted margin (%)

- **Gross customer interest-earning balances** increased 19%, reflecting both credit line increases of existing customers, and new customer growth following the release of new product variants.
  - **Customer numbers** increased 6%, while average customer limits and drawn balances also increased.
- **Asset yield and NIM** reduced lightly YoY due to growth in 0% products driving a reduction in **weighted average APR to 33.7%** (DEC24: 37.4%).
  - Weighted average APR excl. 0% products increased to 39.6% (DEC24: 39.5%), driven by risk-based repricing.
- **RAM** decreased 1.4%, including a 0.8% increase in **cost of risk**, which at 10.2% was at the lower end of the 10-14% guided range (new guidance: 10-13%).

16

Let me now touch upon the performance of each of the lending products, starting with Credit Cards on Slide 16.

The business delivered a profit of £38.2m pounds, up 27%.

This was while growing interest earning balances by 19%, which drove a 13% increase in impairment charges due to the expected IFRS9 impairment provision on origination.

At 10.2%, the cost of risk was at the lower end of the guided range, with 19% lower gross charge offs, as mentioned earlier, highlighting the improved quality of the book.

With the portfolio having reduced 10% in 2024, balances at the end of 2025 were 7% higher than two years ago.

The improved quality has been driven by the actions taken by the new experienced cards management team, following their granular vintage analysis review.

Asset yield declined 80 basis points to 27.1%.

This was driven by the weighted average APR of the portfolio reducing to 33.7%, due to the increased take-up of balance transfers and 0% promotional offers, which increased to 15% of

the portfolio. These offers are effective acquisition tools that are expected to drive further interest income over time.

Excluding these offers, the weighted average APR increased to 39.6%, reflecting our disciplined risk-based pricing strategy.

Combined with lower funding costs, NIM only reduced 50 basis points to 23.3%, while risk adjusted margin was 15.6%.

Overall, we are well-positioned for continued, profitable growth We would, however, expect balances to grow at a more moderate level in 2026 and beyond.

## Vehicle Finance (VF)

*Proactively managing new business growth, while margins improved*

	FY25 £m	FY24 <sup>7</sup> £m	Change %

Average loan value at origination (£)	9,285	8,909	4%
<b>Notable items</b>			
Vehicle Finance receivables review			
Income	-	(4.5)	
Impairment	-	(15.1)	

Gross customer interest-earning balances (£m) & risk-adjusted margin (%)

- **Gross customer interest-earning balances** reduced 8%, in line with expectations, while the new onboarding and servicing platform is built.
- **Asset yield and NIM** both improved YoY, driven by the weighted average APR increasing 0.7% to 29.1%.
- **RAM** improved to 7.4%, including a **cost of risk** of 5.6%, within the guided range of 4-6% (new guidance: 5-7%).
  - Greater clarity on the cost of risk following the VF receivables review last year.
- **Cost: income ratio** improved to 69.9% - focus going forward on improving the operational efficiency through the technology transformation via Gateway.

17

Slide 17 covers Vehicle Finance.

Balances reduced by 8% as we managed new business volumes ahead of the new platform launch, which will be delivered via Gateway, in the second half of 2026.

The business remained loss making, although the loss reduced materially year-on-year at £12.7m.

Repricing actions lifted the weighted average APR to 29.1% boosting both asset yield and NIM by 0.7%.

Combined with a reduction in the cost of risk to 5.6%, risk-adjusted margin increased to 7.4%, driving a 31% increase in risk adjusted income to £54.2m.

Operating costs reduced by 17%, to £66.9m However, the resulting cost: income ratio of 69.9% remains far too high.

Post the launch of the new platform, building scale and automating processes will be key to improving efficiency.

## Second Charge Mortgages (2CM)

*Continued strong growth in a growing market*

	FY25 £m	FY24 <sup>7</sup> £m	Change %
Interest income	28.4	4.8	
Interest expense	(17.8)	(3.4)	
<b>Net interest income</b>	<b>10.6</b>	<b>1.4</b>

RWAs <sup>16</sup>	260	93	
Customers ('000)	9.9	3.7	
Average loan value at origination (£'000)	63.4	59.1	7%

Gross customer interest-earning balances (£m) & risk-adjusted margin (%)

- **Gross customer interest-earning balances** continued to grow at a similar monthly run rate, driven by forward flow origination agreements with partners.
- **NIM** increased 0.7%, driven by a higher asset yield and lower cost of funds.
- **Low cost of risk** given secured lending and weighted average LTV in the low 70s%, resulting in a **RAM** of 2.8%.
- **Capital efficient**, being a secured product with a lower risk weighting.
- Customers primarily using 2CM for **debt consolidation**.

18

Second Charge Mortgages continued their strong growth, as shown on Slide 18.

Balances reached just under £600m, risk adjusted margin increased to 2.8% and the business delivered a profit of £5.4m.

With a weighted average loan-to-value on the combined first and second charge mortgages of just over 70%, the cost of risk remains low.

As a secured product Second Charge Mortgages have a low RWA density driving attractive returns on capital.

We have rapidly become a market leader in this space. Through strong origination partnerships, we remain excited about its growth potential, with the overall market originations growing annually at mid-teens percentages, in recent years.

## Corporate Centre

Streamlined following reallocation of funding and operating costs to products

	FY25 £m	FY24 <sup>7</sup> £m	Change %
Interest income <sup>21</sup>	44.1	46.3	(5)%

<b>Total notable items</b>	<b>(3.0)</b>	<b>(111.7)</b>	

- Corporate Centre includes:
  - Unallocated Treasury result** after product allocations
    - Interest income primarily reflects returns from the Group's Liquid Asset Buffer
    - Interest expense from unallocated Tier 2 capital is retained in Corporate Centre
  - Retail Savings business costs**
  - Snoop income and costs**
  - Immaterial or central items.
- The reduced Corporate Centre drag reflects the non-repeat of notable items.

19

Slide 19 shows the streamlined Corporate Centre following the reallocation of both funding and operating costs to product lines.

Excluding notable items, the Corporate Centre has reported a loss of circa £20m in each of the last two years.

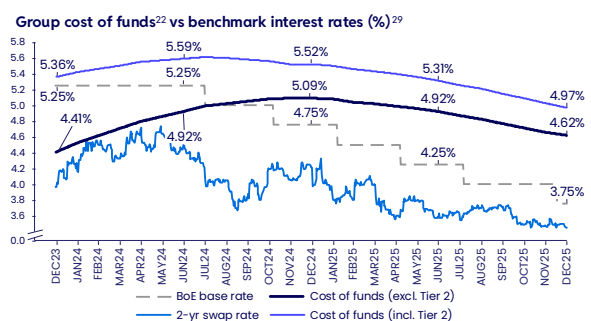

It includes returns from the Liquid Asset Buffer, interest costs on unallocated Tier 2 capital and operating costs from Retail Savings and Snoop.

## Liquidity & Funding

Dynamically managing liquidity and funding

Liquidity	DEC25 £m	DEC24 £m	Change
HQLA <sup>17</sup>	998	947	5%
LCR <sup>18</sup>	306%	359%	(53)
Excess HQLA over LCR <sup>27</sup>	653	667	(2)%
Funding <sup>28</sup>	DEC25 £m	DEC24 £m	%
Fixed-term savings	1,505	1,415	50.5%
Fixed Individual Savings Accounts (ISAs)	503	-	-
Retail notice accounts	437	602	21.5%
Easy access accounts – Vanquis	241	376	13.4%
Easy access accounts – Snoop	258	-	-
Easy access and notice ISAs	40	6	0.2%
<b>Retail Deposits</b>	<b>2,984</b>	<b>2,399</b>	<b>85.6%</b>
Vehicle Finance securitisation	200	200	7.0%
Tier 2 capital	142	200	7.0%
Indexed Long-Term Repo (ILTR)	-	5	0.2%
<b>Total on-balance sheet funding</b>	<b>3,326</b>	<b>2,804</b>	

- Highly liquid** with most of the surplus liquidity held in the BoE reserve account and the balance diversified into higher-returning UK Gilts (£250m purchased).
- Continued optimisation of retail funding** through a broader and more diversified product range, including ISAs, and distribution reach through the Snoop brand.
- 99% of retail deposit balances covered** by the Financial Services Compensation Scheme (FSCS).

- Decreased cost of funds** reflecting the lower BoE base rate, reduced ratio outlook and maturing fixed-term deposits being refinanced with lower interest rate savings products.
- Vehicle Finance securitisation** due for renewal in JUN26.
- Maintained regular access to the **Sterling Monetary Framework via the ILTR facility**.
- Contingent liquidity** with Credit Card collateral pre-positioned with the BoE.
- Tendered £58.5m on Tier 2 capital** in OCT25 alongside £60m AT1 issuance.

20

Liquidity and funding remain core strengths, as shown on Slide 20.

At year end we held £653m of excess high-quality liquid assets over the regulatory minimum. We continue to improve returns from the Liquid Asset Buffer with £250m now invested in UK gilts.

Retail deposits have grown to nearly £3bn representing close to 90% of total funding.

We have diversified our deposit mix, introducing both fixed and instant access ISAs, as well as Snoop branded, easy access accounts. The former provides increased stability in the retail funding base, while the growth in easy access accounts provides more pricing flexibility and has contributed to the reduction in the cost of funds over the last 12 months.

We also tendered £58.5m our outstanding Tier 2 capital. This further reduced funding costs and was part of a broader capital optimisation transaction, which is summarised on slide 21.

## Capital optimisation

*Capital stack optimised by utilising AT1 capacity and reducing Tier 2*

\* Includes confidential and management buffers, subject to regulatory requirements.

At the end of the third quarter, we successfully issued £60m of AT1 capital and concurrently, executed the Tier 2 tender.

This transaction had no impact on the total capital ratio, as the Tier 2 capital was replaced with AT1. The Group retains a significant total capital surplus above its regulatory minimum.

The key to the transaction was that we were able to improve the efficiency of our Tier 1 capital stack, increasing the surplus above the regulatory minimum, which was previously all held in CET1 capital.

With this transaction the binding capital measure for the Group is now the CET1 ratio. With the regulatory minimum 230 basis points lower than the Tier 1 minimum, the transaction has freed

up additional capital to deploy for profitable growth, which we accelerated in 2025, as can be seen on slide 22.

## CET1 capital

*Deployed capital for growth in 2025, with continued capital strength to deliver our plans*

- 40bps benefit from the **Personal Loans portfolio sale**.
- 40bps benefit from the **statutory profit after tax**.
- 280bps reduction from the £304m **RWA increase** reflecting the 25% growth in net receivables.
- **CET1 ratio 5.2% above the 11.3% regulatory minimum**, equating to a £107m surplus\*.
- **The Group's capital requirements were reviewed by the PRA in 2H25** as part of the triennial CSREP review.

\* Includes confidential and management buffers, subject to regulatory requirements.

The CET1 capital ratio reduced by 2.3% to 16.5% as the 25% increase in net receivables equated to £304m of RWA growth.

This was partially offset by the capital benefit from the statutory profit in 2025 and the Personal Loans sale. We expect profits to become a more significant, positive contributor to the ratio in future years.

At 16.5% the Group retains a surplus of 5.2% above the 11.3% regulatory minimum. This equates to £107m of surplus CET1 capital.

The Group's disclosed, and undisclosed capital requirements, were also reviewed by the regulator in the second half of last year, which gives us confidence to reduce our target ratio to greater than 14.5%, which I will cover later.

Ultimately, our capital strength and the expectation of increased future profits supports our continued growth plans and the execution of our strategy.

Finally, before I hand back to Ian, given that Vanquis is now a cleaner, more stable, and predictable business, I would expect the level of detail required in our content to reduce in future presentations.

Ian will now talk you through our strategic priorities, before I return to summarise our financial guidance.

## Strategy Update

Ian McLaughlin

Ian McLaughlin, Chief Executive Officer

Dave, thank you.

### Our purpose and ambition

*Serving the borrowing needs of the underserved UK adult population*

#### Our Purpose

'To deliver **caring banking** so our customers can make the most of life's opportunities'.

#### Our Ambition

'To be **the UK's most trusted and inclusive specialist bank**, by unlocking financial opportunity for underserved customers and helping them thrive.'

I'd now like to take you through the market opportunity and how we will complete what is year 3 of our current strategic plan that will take us through to 2027.

Slide 24 shows how we frame our strategy in terms of our purpose and our ambition.

Vanquis is a specialist bank with a clear social purpose, focused on serving customers who are underserved by mainstream lenders.

Our purpose is to deliver caring banking, so our customers can make the most of life's opportunities.

Now that means different things to different people:

It might be accessing credit when it matters most, improving your credit profile to unlock better options, or simply feeling more in control of your money.

Caring banking is about how we show up for customers, whatever stage of their financial journey they happen to be at.

And it means understanding customers' needs, earning their trust, supporting healthy financial choices and being there for them when it matters most and when they need us most.

Our ambition then builds on that purpose.

We aim to be the UK's most trusted and inclusive specialist bank, unlocking financial opportunity for underserved customers and helping them thrive.

That ambition is very deliberate.

It recognises the scale of the market we serve and the responsibility that comes with serving these customers.

## Our strategy

*Reaching more customers, enabling responsible borrowing and financial resilience, and scaling efficiently to create sustainable long-term value*

**Serve More**

Reach more customers and deepen relationships across the underserved UK adult population

**Serve Responsibly**

Ensure our lending is affordable for customers, enabling them to build financial resilience, whilst supporting financial inclusion.

**Scale Profitably**

Grow efficiently, optimise capital deployment and enhance long-term returns.

This brings me to our strategy on slide 25.

This is deliberately simple and practical, built around a new three pillar framework:

Serve More, Serve Responsibly, and Scale Profitably.

This is not a change in direction for us. It is just a clearer articulation of how we run and grow the business as we continue to move from turnaround towards sustainable growth.

To give some more depth to these 3 pillars: Serve More is about widening access to responsible, affordable credit and deepening long-term customer relationships.

Serve Responsibly ensures that growth is predictable, well controlled, with strong affordability, disciplined risk decisions and consistently good customer outcomes delivered.

And Scale Profitably is how we turn that growth into returns, through the disciplined cost control, capital allocation and margin management that you are seeing us deliver, and as Dave has just discussed in detail.

Gateway underpins all three pillars by providing a modern, efficient technology platform to grow on and supports a lower run-rate cost base.

Together, these pillars link growth, control and returns and provide the framework that guides the decisions we make and execute day to day.

## A significant and growing underserved UK adult population

*Vanquis aims to serve the borrowing needs of underserved consumers and help them on a path to financial resilience*

Experian analysis concludes there are **over 24 million underserved UK consumers** – over half the adult population with an active credit profile:

Independent research highlights why Vanquis matters:

"20.2 million adults in the UK are underserved, and a further 8.9 million are financially fragile."  
PwC & TotallyMoney (2022)

"17 million UK adults are unable to access mainstream loans or credit cards due to thin or impaired credit files. Of these, over 9 million were declined for credit in a single year, with poor credit history being the top reason at 38%"  
Money and Pensions Advice Service (2023)

"More than 3 million people have borrowed from an unlicensed or unauthorised money lender in the last three years"  
Fair4All Finance (2023)

"The UK's non-prime lending market has shrunk by 34% since 2019, with loans to sub-prime borrowers down 76%."  
Financial Times (2024)

Meaningful opportunities within the underserved market via our core products, underpinning our growth plans and the longer-term opportunity

Looking now at slide 26, this addresses one of the questions that I am most regularly asked which is about the total market opportunity we are focused on delivering to.

The UK has a large and persistent underserved adult population.

Our research indicates that over 24 million UK adults face barriers to accessing mainstream credit.

This is therefore not a niche segment. It represents more than half of the adult population who have an active credit profile.

And importantly, this is a structural feature of the UK market rather than a cyclical one.

At Vanquis we exist to serve this segment responsibly, providing access to credit where it is affordable and appropriate and introducing customers to other solutions if we can't immediately serve them.

Our existing product set allows us to address a large proportion of this market within our current risk appetite - within Credit Cards, Vehicle Finance and Second Charge Mortgages, as Dave has just described.

### Market opportunity supports growth plans

Guiding to >£3.3bn in balances by the end of 2026, growing to >£3.7bn by 2027

Balances in all products expected to grow through to 2027. Increasing mix of 2CM expected to drive a reduction in RAM but attractive returns

On slide 27, you can see how we think about the market opportunity through to 2027 and, importantly, how we grow within it in a disciplined way.

We plan to grow balances across all of our asset products, but that growth will be deliberate and phased.

Credit Cards will continue to grow, but at a moderated pace compared to 19% in 2025.

Vehicle Finance growth is more backended, linked to the completion of our new onboarding and servicing platform under Gateway.

From the second half of 2026, Vehicle Finance will become an increasingly cost-efficient line of growth, facilitated through the strong broker relationships that we have retained.

Second Charge Mortgages plays a different role in our mix. As you know, this is a secured product with a lower risk weight density. It has become very successful for us, and we expect the rate of growth to continue at broadly similar levels.

As this drives a mix shift over time, our Group risk-adjusted margins will naturally change to reflect this, but the business we are writing remains attractive across all products and consistent with our return targets.

Overall, what you are seeing us do is about balance. Growing but managing mix and quality carefully so that we convert that growth into sustainable returns.

### Driving financial inclusion with responsible lending solutions

Existing products enable customers to build their financial resilience

Have strengthened customer affordability assessments and credit decisioning across all products

On slide 28, this is where Serve Responsibly underpins our ability to deliver the strategy with discipline.

And responsible lending is not a constraint on growth for us. It's actually what ensures that our growth is sustainable and predictable.

In Credit Cards, more granular, risk-based pricing allows us to widen access to credit while ensuring pricing accurately reflects individual risk and affordability.

That allows us to grow the book while maintaining credit quality and customer outcomes.

In Vehicle Finance, you can see we have rebalanced the APR mix and tightened alignment between risk, pricing and returns. Again, this will support controlled growth as the platform scales.

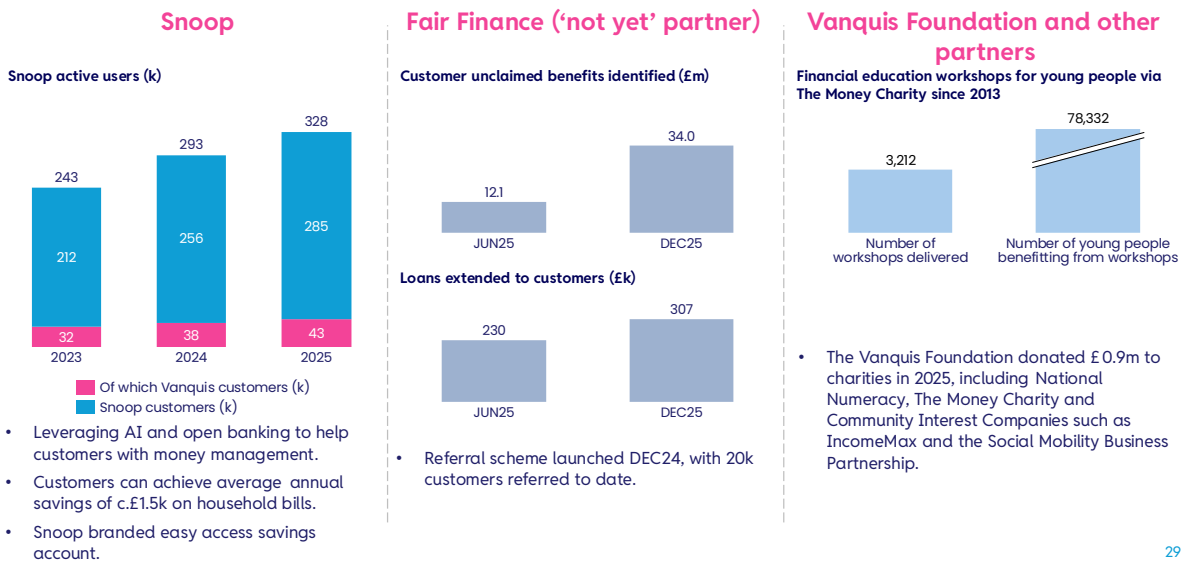

The Second Charge Mortgages product is primarily used for debt consolidation, enabling customers to have lower monthly outgoings, and resulting in improved resilience for them.

Loan-to-value ratios remain well controlled, underpinning strong returns as the portfolio continues to grow.

These disciplines support responsible growth, protect customer outcomes and deliver predictable performance across credit cycles.

## Building pathways to stronger financial health

Improving credit profiles via Snoop, 'not yet' partners and the Vanquis Foundation

Slide 29 shows how we support customers to improve their financial health.

Snoop is central to this as I have mentioned. It acts as a key enabler of our inclusion strategy and long-term growth model.

Using Open Banking data and AI, Snoop helps customers manage everyday money, build confidence and develop healthier financial behaviours.

And for many users, this translates into meaningful savings over time, through better bill management, smarter spending and easier supplier switching.

For those customers who are not yet ready, or we are not able to offer credit to right now, the programme delivered with Fair Finance provides a responsible alternative for them.

And the Vanquis Foundation and our community partners extend this support, investing in financial education, inclusion initiatives and accessible debt advice to build capability earlier and reduce long-term financial exclusion.

## Leveraging our deposit franchise to drive scalable growth

Banking licence provides a structural funding advantage over competitors

Funding mix (£m)<sup>28</sup>

- Cost of funds from retail deposits lower than wholesale funding.
- Flexible retail deposits enable faster ability to reprice.

Average deposit pricing<sup>34</sup> vs benchmark interest rates (%)<sup>29</sup>

Group cost of funds have reduced throughout 2025, reflecting the lower BoE base rate, reduced rate outlook and maturing fixed-term deposits being refinanced with lower interest rate savings products.

\*Flexible deposits includes - Retail notice accounts, easy access accounts (Vanquis and Snoop) and easy access and notice ISAs

Turning to slide 30, and again building on Dave’s earlier comments, our banking licence gives us a clear and durable funding advantage.

Retail deposits provide us with stable, low-cost funding that many specialist lenders do not have access to.

Through 2025, as you’ve seen, our deposit costs reduced steadily.

This reflects a combination of lower interest rates and a shift towards lower cost savings products.

You can see this clearly in the funding mix on the slide.

This has allowed us to price competitively, protecting margins and improving overall funding efficiency.

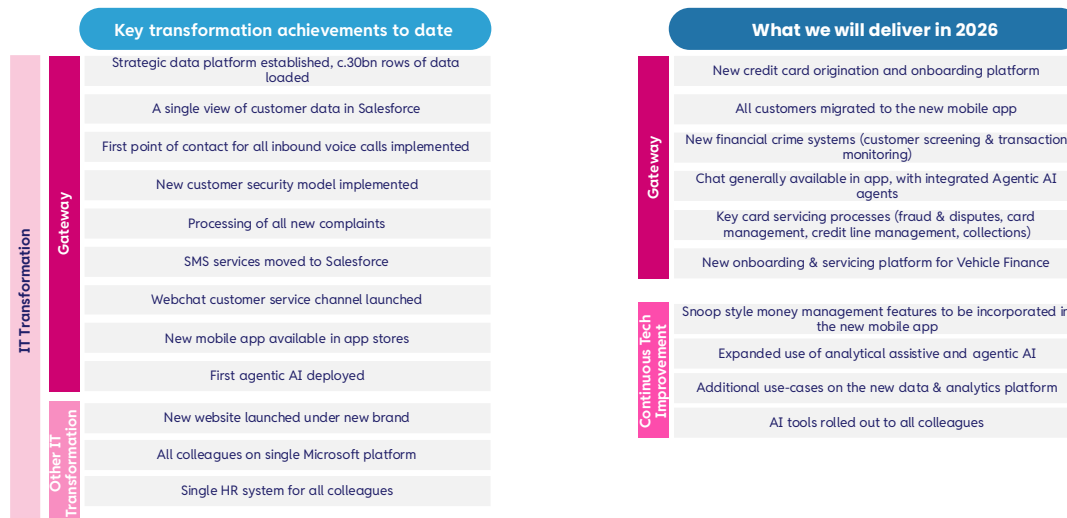

We will continue to diversify and optimise our deposit base as we look ahead, expanding flexible savings products and using Snoop as a scalable distribution channel to support efficient, low-cost deposit-led growth.

In short, our funding advantage strengthens our margins, improves resilience across the cycle and underpins our ability to grow profitably over time.

## Gateway is the catalyst for long-term growth & innovation

*Gateway substantively delivered and will complete in 2026*

Building a modern, efficient and scalable technology platform that enables digital first offerings, better customer engagement & accelerated speed to market for new products, features and services

31

Coming back to Gateway on slide 31. It has been an underlying theme of my remarks as it is the catalyst that underpins our long-term growth and innovation agenda.

It is a fundamental reset to address the previous under investment in technology which this business was suffering from. It will enable us to operate as a modern, efficient and digital first bank and to scale.

Importantly, as you can see on the left-hand side, the majority of Gateway’s core capabilities have already been delivered, with clear progress across customer experience, control and resilience.

Gateway is now an operational platform with regular feature releases and improvements. For example, we have already launched a Chat channel for customers and are deploying Agentic AI agents to improve service quality and to reduce our costs.

Looking ahead, the last major components of Gateway complete in 2026, and the benefits then become structural - through fewer systems, streamlined processes and improved automation, which in turn means improved resilience, lower run-rate costs and better operating leverage.

In short, Gateway is the strategic enabler of our business, allowing us to complete those three pillars of Serve More, Serve Responsibly and Scale Profitably.

Let me pause there, as we will come back to expand further on our next 3-year strategic cycle at a future date. Our focus for now remains on disciplined execution and delivering 2026 as planned.

With that, I will now hand back to Dave to talk through our guidance.

## Financial guidance

Dave Watts

**Dave Watts, Chief Financial Officer**

Thanks, Ian.

### Financial guidance out to 2027

*Committed to delivering improved and sustainable long-term value for our shareholders*

	FY25 Actuals	FY26 Guidance	FY27 Guidance
Gross customer interest-earning balances <sup>1</sup>	£2,824m	>£3.3bn <i>(c.£3.0bn previously)</i>	>£3.7bn
Net interest margin (NIM) <sup>2</sup>	16.8%	c.15.5% <i>(-&gt;16% previously)</i>	c.14.5%
Risk-adjusted margin (RAM) <sup>13</sup>	11.0%	>9.5%	>9.0%
Cost: income ratio <sup>3</sup>	58.4%	High 40s <i>(low 50s previously)</i>	Mid 40s <i>(c.49% previously)</i>
<b>Statutory ROTE<sup>4</sup></b>	<b>2.3%</b>	<b>Low double digits</b>	<b>Mid-teens</b>
CET1 ratio <sup>15*</sup>	16.5%	>14.5%	

\*Guidance subject to regulatory change

Slide 33 summarises the guidance we have laid out this morning.

Importantly we remain 'on track' to deliver our Statutory ROTE guidance of 'low double digits' for 2026 and 'mid-teens' for 2027.

However, I would expect profits to be higher in the second half of this year, compared to the first half, as balances mature and interest income builds.

We now expect balances in 2026 to exceed £3.3bn and to increase to greater than £3.7bn by the end of 2027 as we balance growth, with the improved profits required, to deliver the higher ROTEs we are targeting.

The balance base and the deliberate change in product mix, that Ian has talked about, including a greater proportion of Second Charge Mortgages, is expected to result in a continued reduction in NIM, to around 15.5% in 2026, and 14.5% in 2027.

Now that we have greater clarity on the cost of risk across our products, and to better align to how we assess the performance of the respective products, we have also introduced risk-adjusted margin guidance. This is expected to reduce, both in 2026 and in 2027, but remain above 9.5%, and 9% in the respective years. Again, this is driven by the increasing proportion of Second Charge Mortgages.

Alongside income growth, continued cost discipline will be a key lever of the improving profit trajectory over the next two years. This will drive the cost: income ratio down from the ‘high 50s’ in 2025 to the ‘high 40s’ in 2026 and the ‘mid-40s’ in 2027.

### Statutory ROTE and cost: income ratio

*Delivering meaningful improvement in ROTE and reduction in cost: income ratio*

Turning to slide 34, the bridge on the left-hand side provides an indicative view of how we expect to deliver ‘mid-teens’ ROTE by 2027.

As you can see, risk adjusted income growth is a meaningful contributor, but continued cost take out is also a significant lever.

This will be achieved through ongoing transformation savings, including an additional 23 to £28m from the completion of Gateway, and an ongoing focus on cost discipline driving further operational efficiencies across the Group.

At the same time, we will continue to invest in our business.

## Capital management

*Well positioned to deliver growth as the Group returns to organic capital generation*

### Robust capital position above regulatory minimums

#### Tier 1 ratio guidance (%)<sup>5</sup>

#### CET1 ratio guidance (%)<sup>15</sup>

- Capital guidance has been reducing in recent years reflecting:
  - A cleaner and more stable financial position
  - Lower risk mix of business.
- The Group's capital requirements were reviewed by the PRA in 2H25 as part of the triennial CSREP review.
- Capital guidance updated to a CET1 ratio following capital optimisation:
  - Issuance of £60m of AT1 in 4Q25, meaning the Group is no longer Tier 1 capital constrained.
- As a result, the Group has reduced the CET1 ratio guidance to >14.5%.**
- This guidance remains subject to changes in regulatory requirements.

### Capital being deployed for growth in the near term

#### Gross customer interest-earning balances (Ebn)<sup>1</sup>

- Vanquis continues to build scale in the near-term to deliver its ROTE guidance of low double digits in 2026 and mid-teens in 2027, at which point the Group becomes meaningfully capital accretive.

The Board intends to reset the capital allocation framework and distribution policy following full delivery of the strategy in 2026.

<sup>5</sup> This includes confidential and management buffers, as appropriate.

35

As set out on Slide 35, we will continue to deploy capital for growth in the near-term.

As I have mentioned, we are now comfortable operating with a CET1 ratio guidance of 'greater than 14.5%'. This follows the capital optimisation transaction that we executed last year, the reducing risk profile of the business, and the outcome of the recent regulatory review of the Group's capital requirements.

The existing capital capacity, alongside the capital accretion we expect to generate from increased profits over the next two years, means that we are well positioned to deliver the growth we are targeting.

Having achieved what we said we would do in 2025, we remain 'laser-focused' on the execution of our plan, and are fully committed to delivering, sustainable, long-term value for our shareholders.

And with that, I will hand you back to Ian.

## Conclusion

Ian McLaughlin

**Ian McLaughlin, Chief Executive Officer**

Thank you, Dave.

### **Serve More. Serve Responsibly. Scale Profitably.**

*Our strategy is guided by a clear understanding of what sets us apart and how we will harness these strengths to deliver growth and sustainable profitability*

#### **What sets us apart**

##### **A large underserved market**

- Over half of UK adults face barriers to accessing mainstream credit. Vanquis has a significant opportunity to grow market share in our core products.

##### **A customer proposition to build financial resilience**

- Offer lending, savings and money management solutions to address three core customer needs: healthy borrowing, controlled spending and the ability to build a financial safety net.

##### **Cost effective funding model as we build scale**

- Retail deposits provide stable, low -cost funding.

##### **A modern, efficient and scalable technology platform**

- Gateway enables digital first offerings and customer engagement

This gives us confidence in the Group delivering low double digits ROTE in 2026 and mid -teens in 2027

37

Turning to slide 37, let me close by bringing together our key messages from today.

Vanquis is built on a set of clear and durable strengths.

We operate in a large and structurally underserved UK market, with persistent demand for responsible credit.

We have a customer proposition designed to help them to build better financial resilience.

Our banking licence provides a cost-effective, deposit-led funding model.

Gateway gives us a modern, efficient and scalable technology platform.

These strengths are brought together through a clear and practical strategy as I have described:

Serve More, Serve Responsibly, and Scale Profitably.

The strategic framework that we now have in place will allow us to build on the progress that you can see in these 2025 results. We can continue to grow sustainably, strengthening our franchise and delivering attractive long-term returns. That is how we will create long-term value for customers, colleagues and shareholders.

Thank you for listening. I will now hand back to the operator to open the line for questions.
